EDUCATION

J.C. Bose University of Science and Technology, YMCA, Faridabad August 2023 - June 2027

Bachelor of Technology in Computer Engineering (Data Science)

CGPA: 8.1/10.00 (up to 5th semester)

Govt. Sr. Sec. School, Krishanpura

April 2021 - March 2022

Board of School Education Haryana (Class - XII)

Percentage: 86.6%

Dr. R. K. Sr. Sec. School, Kutani Road, Panipat

April 2019 – March 2020

Board of School Education Haryana (Class - X)

Percentage: 93.6%

TECHNICAL SKILLS

Programming: C++, Java, Python

Web Development: HTML, CSS, JavaScript

Data Science & ML: NumPy, Pandas, Matplotlib, Scikit-learn, Seaborn, Streamlit

Tools and Technologies: SQL, Git & GitHub

COURSEWORK

- Data Structures and Algorithms
- Object-Oriented Programming
- Operating Systems
- Database Management Systems
- Artificial Intelligence
- Machine Learning

PROJECTS

SchemeSathi – Govt Scheme Recommendation System — MERN Stack, ML, JWT

- Developed a rule-based recommendation system that suggests central and state government schemes based on user profile, income, age, and eligibility criteria.
- Implemented machine learning classification and rule-based filtering to deliver personalized scheme recommendations with high accuracy.
- Enabled users to save and compare recommended schemes, improving engagement and usability.

Deepfake AI Video Detection — Python, CNN, OpenCV, TensorFlow

- Developed an AI-powered system to detect deepfake videos using Convolutional Neural Networks and frame-level facial feature analysis.
- Extracted key facial landmarks and micro-expressions using OpenCV to identify manipulation artifacts in video frames.
- Trained a custom CNN model on publicly available deepfake datasets to classify videos as “real” or “fake” with high precision.

ACHIEVEMENTS

- Secured 2nd position in the District-Level Science Quiz Competition, demonstrating strong analytical thinking and conceptual understanding.
- Solved 200+ Data Structures and Algorithms problems on LeetCode and GeeksforGeeks.
